

**IN THE CLAIMS:**

The text of all pending claims (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~striketrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

1-21. (canceled)

22. (currently amended) The goods purchase information processing system according to claim 25 wherein said mobile terminal transfers the goods purchase information from the memory into a household budget system of ~~said~~ a processing device of said user.

23. (currently amended) The goods purchase information processing system according to claim 26, wherein said mobile terminal transfers the goods purchase information from the memory into a household budget system of ~~said~~ a processing device of said user.

24. (canceled)

25. (currently amended) A goods purchase information processing system in a store, comprising:

a mobile terminal having a first communication unit, a first controller and a memory and adapted to being held by a user;

a reader reading goods information for goods purchased by said user of said mobile terminal; and

a register terminal comprises:

a second communication unit for communicating with said mobile terminal;

a third communication unit for communicating with said reader; and

a second controller connected to said second and third communication units and calculating goods settlement information from said read goods information through said third communication unit and processing the settlement in response to a prompt from a settlement key in accordance with authorization of said user, ~~wherein said controller sends and sending~~ said goods settlement information to said mobile terminal in response to a prompt from the settlement key of said goods settlement information through said second communication unit, ~~and~~

wherein the mobile terminal temporarily stores the goods purchase information in said memory.

26. (currently amended) A goods purchase information processing system, comprising:  
a mobile terminal having a first communication unit, a controller and a memory and adapted to being held by a user;  
a reader reading the goods information for the goods purchased by said user; and  
a register terminal provided separately to said reader and calculating the goods settlement information from said read goods information and processing the settlement,  
wherein said reader comprises:  
a second communication unit for communicating with said mobile terminal; ~~and~~  
a third communication unit for communicating with said register terminal; ~~and~~  
~~wherein said reader sends a scanner controller sending~~ a send enable signal to said mobile terminal when said reader reads a barcode of said goods, ~~receives receiving~~ a receive signal from said mobile terminal according to said send enable signal through said second communication unit, ~~requests requesting~~ said goods purchase information to said register terminal in response to said received ~~signal request, and receiving~~ receives said goods purchase information from said register terminal through said third communication unit, and  
wherein said scanner controller sends said received goods purchase information to said mobile terminal through said second communication unit, and the mobile terminal temporarily stores the goods purchase information in a memory.
